

CNL(05)46

Draft Text for Insertion in Paragraph 4.1 of CNL(05)40 to replace subparagraphs 1-3

- There should be one single implementation plan aimed at replacing all existing reporting mechanisms, where appropriate;
- Task Force should identify the key elements to be included in the Plan;
- While it would be useful for the Task Force to draw up guidelines on the format of the Plan, there should be sufficient flexibility to accommodate different reporting requirements between jurisdictions;
- The Task Force should decide on the timetable for the delivery and reporting of Implementation Plans (it is suggested that 31 December 2005 would be appropriate if these Plans are to be available for the Annual Meeting in 2006);
- The Task Force might review the need for Recommendation 6 in light of the suggestion that the Implementation Plans should cover all appropriate reporting mechanisms.
