Annual Progress Report on Actions Taken Under the Implementation Plan for the Calendar Year 2019

EU – Finland

## CNL(20)34

# Annual Progress Report on Actions taken under the Implementation Plan for the Calendar Year 2019

The Annual Progress Reports allow NASCO to evaluate progress on actions taken by Parties / jurisdictions to implement its internationally agreed Resolutions, Agreements and Guidelines and consequently the achievement of their objectives and actions taken in accordance with the Convention. The following information should be provided through the Annual Progress Reports:

- any changes to the management regime for salmon and consequent changes to the Implementation Plan;
- actions that have been taken under the Implementation Plan in the previous year;
- significant changes to the status of stocks, and a report on catches; and
- actions taken in accordance with the provisions of the Convention.

In completing this Annual Progress Report please refer to the Guidelines for the Preparation and Evaluation of NASCO Implementation Plans and for Reporting on Progress, CNL(18)49.

These reports will be reviewed by the Council. Please complete this form and return it to the Secretariat no later than 1 April 2020.

Party:	European Union
Jurisdiction / Region:	Finland

### 1: Changes to the Implementation Plan

- 1.1 Describe any proposed revisions to the Implementation Plan (Where changes are proposed, the revised Implementation Plans should be submitted to the Secretariat by 1 November).
- 1.2 Describe any major new initiatives or achievements for salmon conservation and management that you wish to highlight.

Reduction of the fishing mortality by 30 %, as planned in the Tana-fishing rule

#### 2: Stock status and catches.

2.1 Provide a description of any new factors that may significantly affect the abundance of salmon stocks and, if there has been any significant change in stock status since the development of the Implementation Plan, provide a brief (200 word max) summary of these changes.

2.2 Provide the following information on catches: (nominal catch equals reported quantity of salmon caught and retained in tonnes 'round fresh weight' (i.e. weight of whole, ungutted,				
unfrozen fish) or 'rot				
(a) provisional nominal	In-river	Estuarine	Coastal	Total
catch (which may be	21,2			21,2
subject to revision) for				
2019 (tonnes)				
(b) confirmed nominal	24,4			24,4
catch of salmon for				
2018 (tonnes)				
(c) estimated	3			3
unreported catch for				
2019 (tonnes)				
(d) number and	na			
percentage of salmon				
caught and released in				
recreational fisheries in				
2019				

# 3: Implementation Plan Actions.

**3.1 Provide an update on progress on actions relating to the Management of Salmon Fisheries** (section 2.9 of the Implementation Plan). Note: the reports under 'Progress on action to date' should provide a brief overview of each action. For all actions, provide clear and concise quantitative information to demonstrate progress. In circumstances where quantitative information cannot be provided for a particular action because of its nature, a clear rationale must be given for not providing quantitative information and other information should be provided to enable progress with that action to be evaluated. While referring to additional material (e.g. via links to websites) may assist those seeking more detailed information, this will not be evaluated by the Review Group.

may (	may assist those seeking more detailed information, this will not be evaluated by the Review Group.		
Action F1:	Description of action (as submitted in the IP):	Monitoring the stock status of multiple salmon populations in the Teno system by estimating fishing mortality of various, sequential fisheries. Analysis of suggested measures to react to undesired mortality levels (addressed strongly in the new Fin-Nor Teno agreement 2017).  Assessment of the effect of the new agreement and its regulations: will the reduction of fishing mortality enable stock recovery?	
	Expected outcome (as submitted in the IP):	An overall reduction of fishing mortality of 30% compared to the estimated level in 2016 prior to the new agreement.  Annual assessment of stock status of the Teno populations, varying methods.	
	Progress on action to date (Provide a brief overview with a quantitative measure, or other justified evaluation, of progress. Other material (e.g.	According to the Finnish-Norwegian research group, major result of the present status estimation is that the exploitation estimates show decreasing exploitation for all individual salmon stocks in the mixed-stock fishery in the Tana/Teno mainstem following the newly implemented agreement between Norway and Finland. The reduced exploitation rates for all stocks in need of

Current status of action:	Ongoing
If 'Completed', has the action achieved its objective?	
Description of action (as submitted in the IP):	Defining spawning targets for the Näätämöjoki river system.
Expected outcome	Spawning target estimated, first compliance assessed in 2021.
Progress on action to date (Provide a brief overview with a quantitative measure, or other justified evaluation, of progress. Other material (e.g. website links) will not be evaluated):	Distribution areas of salmon investigated in 2019, new areas discovered. Genetic samples collected in different parts of the watershed. This will enable analyses of mixed-stock catches in future
Current status of action:	Ongoing
If 'Completed', has the action achieved its objective?

	If 'Completed', has the action achieved its	
	objective?	

**3.3 Provide an update on progress on actions relating to Aquaculture, Introductions and Transfers and Transgenics** (section 4.11 of the Implementation Plan). Note: the reports under 'Progress on action to date' should provide a brief overview of each action. For all actions, provide clear and concise quantitative information to demonstrate progress. In circumstances where quantitative information cannot be provided for a particular action because of its nature, a clear rationale must be given for not providing quantitative information and other information should be provided to enable progress with that action to be evaluated. While referring to additional material (e.g. via links to websites) may assist those seeking more detailed information, this will not be evaluated by the Review Group.

Action	Description of action	Continue the spread of information. Applying and enforcing
Action A1:	Description of action (as submitted in the IP):	the current, renewed legislation for preventing spread of G.salaris.
	Expected outcome	<ul> <li>Active information about the threat of <i>G. salaris</i> and measures to spread information (brochures, billboards, roadside information boards, information at fishing-licence sales)</li> <li>Disinfection station network in the northernmost Finland, training of staff at fishing-licence sales points for disinfection</li> <li>Increased focus on active information at Finnish-Russian boarder station in the River Tuloma watershed, to minimize risks on <i>G. salaris</i> spread from this direction.</li> <li>Spread of <i>G. salaris</i> is prevented</li> </ul>
	(as submitted in the IP): Progress on action to date	The current fisheries agreement in Teno is further strengthening the action against spreading Gyrodactylus
	(Provide a brief overview with a quantitative measure, or other justified evaluation, of progress.	salaris.  Preparations for more active information at Finnish-Russian boarder station in the River Tuloma watershed was prepared.
	Other material (e.g. website links) will not be evaluated):	Existing network of disinfection stations and information have functioned in a planned manner, no infected areas found.
	Current status of action:	Ongoing
	If 'Completed', has the action achieved its objective?	
Action A2:	Description of action (as submitted in the IP):	Continuation of monitoring the incidence of farmed salmon in the catches. In addition, genetic monitoring will enable more effective detection of possible escapes in wild populations.  Other measures are mostly Norwegian responsibility.  No new actions planned.
		New genetic baseline on Teno salmon populations will be collected in 2019-2021. this will help in assessing the inpact of escaped farmed salmon on wild salmon populations.
	Expected outcome (as submitted in the IP):	Improved and up-to-date information about the amount of aquaculture escapees for decision-making if necessary.
	Progress on action to date (Provide a brief overview with a quantitative	Monitoring has continued as planned, also using some new methods, like new sonar monitoring. Results show continuous minor proportions of escaped farmed salmon in the system
	measure, or other justified evaluation, of progress. Other material (e.g. website links) will not be evaluated):

## 4: Additional information required under the Convention

4.1 Details of any laws, regulations and programmes that have been adopted or repealed since the last notification.

A new section (119 §) about forfeiture payments (conservation value of endangered species) was included to the Finnish Fisheries Act. Fisher who has kept an illegally caught fish may be charged with a forfeiture. Forfeitures have been defined for a range of species and the values vary. Forfeiture value for Atlantic Salmon is among the highest, 3420 €/individual. This amendment was added to strengthen sanctions of fisheries law offences.

- 4.2 Details of any new commitments concerning the adoption or maintenance in force for specified periods of time of conservation, restoration and other management measures.
- 4.3 Details of any new actions to prohibit fishing for salmon beyond 12 nautical miles.
- 4.4 Details of any new actions to invite the attention of States not party to the Convention to matters relating to the activities of its vessels which could adversely affect salmon stocks subject to the Convention.
- 4.5 Details of any actions taken to implement regulatory measures under Article 13 of the Convention including imposition of adequate penalties for violations.

#### **North American Commission Members only:**

4.6 Details of any new measures to minimise by-catches of salmon originating in the rivers of the other member.

n/a	
4.7	Details of any alteration to fishing patterns that result in the initiation of fishing or increase
	in catches of salmon originating in the rivers of another Party except with the consent of the
	latter.
n/a
