

***Mixed-Stock Fisheries  
(Tabled by the Russian Federation)***

In 2021 Atlantic salmon mixed-stock fisheries (MSF) was still in operation in coastal areas of the White Sea only. Fisheries targeting Atlantic salmon in the Barents Sea was banned in late 1950s. The brief description of MSF was provided in the North-East Atlantic Commission document NEA(20)11 in 2020. Recently there have been no changes or developments in MSF management.

In 2020 and 2021 total declared catches of Atlantic salmon taken in MSF in coastal areas of the White Sea were 16.4 and 17.3 t, respectively (Table).

Table. Nominal catches of Atlantic salmon in Russia in 2020-2021 (in tonnes round fresh weight).

Provisional nominal catch (which may be subject to revision) for 2021	In-river	Estuarine	Coastal	Total
	31.57	0.0	17.25	48.82
Confirmed nominal catch of salmon for 2020	32.36	0.0	16.40	48.75
